

# Perfectly Green Product Specification Sheet

## Product: Perfectly Green Play Pad

10mm pad used for installation of artificial grass on concrete, patios, decking, balconies, and roof terraces. Plus sports, leisure and play applications.

### Technical Data

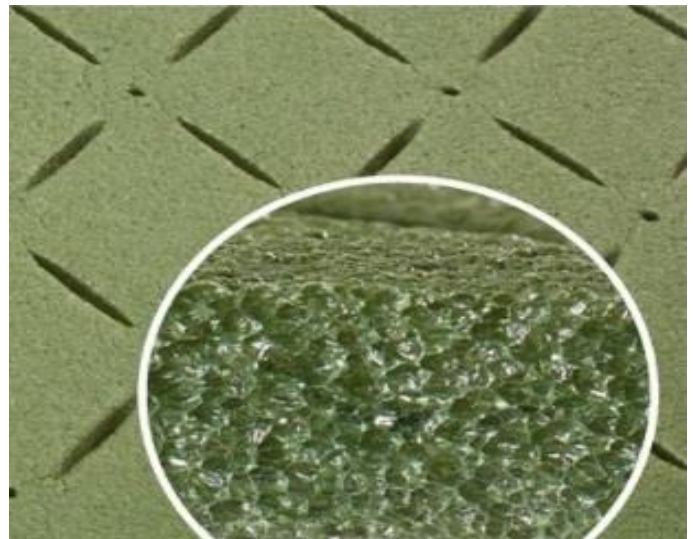

Play Pad is a shock absorbing underlay for gardens, decking, patios, balconies, roof terraces, playground & other leisure projects.

#### Pad depth: 10mm

Properties	Specifications	Unit	Standard
Density	30±10%	kg/m <sup>3</sup>	ISO845
Tensile strength	90.4	KPa	EN12230
Shock absorb	33.7	%	EN14808
Vertical deformation	6.8	mm	EN14809
Water Infiltration	12388	mm/h	EN12616

Based on the material characteristics the foam layers are suitable for use in sport construction.

1. Easy to install as it is light weight and easy handing
2. Closed cell PE foam does not absorb water; can be installed in adverse weather conditions
3. Neat edges makes joining easy
4. The unique design offers excellent water drainage to avoid swelling or shrinking. Dimensions remains stable
5. Excellent shock absorption and ball rebound
6. Will not rot or pulverize through long usage life
7. Heavy-duty machinery is no problem to move on its flat surface
8. Roll length can be tailored to the field/area size, which reduces waste
9. Stable shock absorption
