

Wee Free Artificial Grass Cleaner from Perfectly Green

Reviews

"Best cleaner ever" – 5 ★

"It works, don't try anything else" – 5 ★

"Fantastic product, highly recommended" – 5 ★

Look after your artificial grass with Wee Free....

When used correctly, Wee Free is the most effective artificial grass cleaner on the market!

Key points:

Made in the UK

100% safe for pets, plants, fish and children

Removes dog urine, odour and bacteria from artificial grass

Cleans and brightens the grass blades

Deodourises paving, fences and gravel areas too

Great product!

Wee Free uses specifically chosen **bio-enzymes** to digest and eliminate uric acid crystals and pet waste from the blades of your artificial grass lawn and from the sand or aggregate forming the base of your synthetic garden.

The special formula continues to work on your artificial lawn between cleans.

Wee Free provides technologically advanced cleaning action in 3 ways:

1. Immediate cleaning action comparable with industrial strength floor cleaners with fresh linen scent
2. Brightens and refreshes the artificial grass
3. The bio-enzyme activity continues to degrade organic material as it travels through the synthetic turf, sub-base, soil and or drainage

Beneficial **micro-organisms** in the cleaner are deposited on the grass through normal use of the product. They work to control odours by degrading compounds and organics.

...further information about Wee Free

The **inherent biologic** action and **digestive enzymes** continue to work between application, reducing odour by keeping waste accumulation to a minimum

Wee Free is also effective on other areas your dog might pee, such as paths, decking, gravel areas, patios

Wee Free does not require a further rinse after the final application

Don't delay.... Get Wee Free to keep your lawn.... Wee Free!

Application Advice

Apply using a watering can or a spraying device or container. Wee Free enzymes are only activated when used with water. Use all mixed product within 3 to 4 hours. Excess Wee Free is safe and biodegradable so can be tipped down sinks and drains to clean your pipes.

Wee Free has been designed and produced to keep your artificial lawn and sub-base clean, free from odour and sweet smelling

If your lawn is.... very smelly!

Shake the container. Diluted 1 litre of Wee Free with 5 litres of water, this will cover 3m² of artificial grass. Soak the grass well and leave it for 30 minutes. Rinse well to flush Wee Free through the grass, drainage holes and into the sub-base. Apply to surrounding areas as required. Repeat the process in 5 to 7 days. Very smelly lawns will require repeated application at maximum strength.

If your lawn is.... slightly smelly!

Shake well and add ½ litre of Wee Free to 5 litres of water. This will cover 3 to 5m² of grass, soak the grass, wait then rinse as initial application

If your lawn.... needs pre-emptive protection

Dilute ¼ litre of Wee Free with 5 litres of water. This will cover 5 to 10m² grass, soak the grass, wait then rinse as initial application

Keep your artificial grass lawn fragrant and pong free with Wee Free!!
